

ClearSampler™

application for difficult sampling situations

Diffuse powders or granules on surfaces.

Liquids in porous materials such as carpet.

Water insoluble liquid sheen on water. The ClearSampler with disc can be touched to floating droplets or sheen so that the liquid adheres by surface tension.

Liquids or fine solids on packages such as leaking parcels or envelopes.

The ClearSampler with disc can be pressed onto the stain within the item and the liquid adheres by surface tension.

Liquids or solids on or in rough surfaces such as wood and concrete.

Liquids or fine solids on clothing such as from contaminated victims.

The ClearSampler with disc can be pressed onto the stain in the clothing and the liquid adheres by surface tension.

A video demonstration of the ClearSampler can be viewed at the following link:
