

Orono Spectral Solutions, Inc.
A Full Spectrum Innovator

CLEARSHOT EXTRACTION
TECHNOLOGY
OIL & GREASE MEASUREMENT

FASTER, SAFER, MORE ACCURATE MEASUREMENT

Introducing a Breakthrough Method to Measure Total Petroleum Hydrocarbons (TPH) in Water and Wastewater with Significant Advancements Over Traditional Liquid-Liquid Extraction Methods

- Fast, Precise and Reliable Testing
- Greater Efficiency using Proven Technology with Advancements over Liquid-Liquid Extraction
- Reduced Cost through Chemical Savings, Risk Mitigation and Decreased Time
- Environmental Benefits Achieved with Reusable Components and Reduction of Hazardous Waste
- Safer Procedure with Totally Enclosed Testing System and >90% Reduction in Solvent
- Provides Ability to Identify Oil(s) to Detect Problem Source
- Compatible with OSS Total Oil in Grease (TOG) Method
